

EROAD

GEOTAB®

Real Insights, Made Simple.

EROAD + Geotab Heavy Vehicle Solution

A fleet management platform equipped with TCA-certified telematics designed to enhance safety, assist compliance, and optimise operational efficiency.

Turn fleet data into actionable insights. Spot behavioural patterns, track trends, and uncover areas for improvement with MyGeotab's advanced analytics, predictive benchmarking, and AI-driven insights. With flexible integrations like EROAD's Fuel Tax Credits, Logmaster's Electronic Work Diary, and Whip Around's fleet maintenance tools, you can tailor it to fit your operation.

Benefits

Whether you operate trucks, road trains, or specialist vehicles, our solution helps you meet some of Australia's most critical heavy vehicle regulations*.

Meet regulatory compliance

TCA-approved telematics supports the TCA's reporting requirements for participation in both TMA and RIM monitoring schemes*. Also supports you to meet Chain of Responsibility (CoR) obligations*.

Encourage safer driving

Improve driving habits with in-vehicle feedback combined with event reporting for driver coaching. Set up rules to alert drivers of unwanted driving behaviours like speeding, idling, or not wearing a seat belt.

Respond to incidents & maintain fleet safety

Collision alerts enable you to respond swiftly to potential accidents, and view event details for further investigation.

Get valuable engine data for managing vehicle health, including odometer, engine faults, seatbelt and more.

Support fleet sustainability

Get insights to support efficiency improvements and reduce CO2 emissions with help from MyGeotab fleet sustainability solutions.

Additional Features and Services

These optional advanced features can assist in managing costs, promoting safety, streamlining manual processes, and improving fleet efficiency:

Manage driver fatigue

Support driver compliance with NHVR and Western Australia fatigue regulations through Logmaster's approved* Electronic Work Diary (EWD).

Optimise Fuel Tax Credits

EROAD's ATO-approved FTC solution uses on- and off-road distance reporting to help reduce admin and maximise your Fuel Tax Credit rebates.

*Local, state and national regulations are subject to change and may vary by jurisdiction. While EROAD's products are designed to assist customers in meeting certain regulatory requirements, EROAD makes no representation, warranty, or guarantee regarding customers' compliance with any laws, regulations, or industry standards. Customers are solely responsible for determining, understanding and ensuring their own compliance with any applicable regulations. To the fullest extent permitted by applicable law, EROAD disclaims all liability for any loss, damage, penalty, or expense arising from or related to a customer's failure to comply with any regulatory requirements, regardless of whether EROAD products or services were used by the customer.

National Telematics Framework (TMA & RIM)

The Geotab GO9 Telstra and Telenor Sim devices are Transport Certification Australia (TCA)-approved Level 2 devices for use in the Road Infrastructure Management (RIM) and Telematics Monitoring Application (TMA) schemes. These devices are not approved for use in the Intelligent Access Program (IAP) or Smart On-Board Mass (OBM) schemes. Customers are responsible for verifying device suitability and regulatory requirements for their intended application.

About EROAD

EROAD develops technology solutions (products and services) that manage vehicle fleets, support regulatory compliance, improve driver safety and reduce the costs associated with driving. EROAD also provides valuable insights and data analytics to universities, government agencies and others who research, trial and evaluate future transport networks. This data enables those who use the roads to influence the design, management and funding of future transport networks.

Strengthen your cold chain

Help keep your cold chain compliant with FSANZ regulations through real-time temperature monitoring and alerts. Use advanced insights and predictive shutdown to run more efficiently and help reduce cost.

Advanced driver behaviour

Take driver safety to the next level with customisable driver fatigue and distraction detection technology (FDDT).

See support documents for [hardware technical specifications](#).

Chain of Responsibility

Compliance with Chain of Responsibility (COR) obligations remains the exclusive responsibility of the customer. Customers are required to assess their own risk, verify that the selected solution sufficiently addresses these responsibilities, and confirm that appropriate processes, policies, and procedures are established to support ongoing compliance.

Fatigue Management & Electronic Work Diary

Logmaster's Electronic Work Diary (EWD) solution is approved for use in complying with National Heavy Vehicle Regulator (NHVR) and Western Australia's driver fatigue management regulations. Compliance remain the customer's and driver's responsibility. EROAD is not responsible or liable for the performance, availability, or accuracy of any third-party platforms or services, including but not limited to Logmaster's EWD solution.
