

Keep a closer eye on dashcam health

Dashcams page improvements make it easier to find devices, track RMA status and investigate issues faster.

WHAT'S NEW

Manage your dashcam equipment more easily

- > Find devices quickly with new filters for installation status and fleet group
- > Installed – Pending RMA is now available as a dedicated installation-status
- > Dashcam Excel exports now clearly identify devices pending RMA
- > Dashcam Offline Notification emails now include the fleet group, helping you identify and manage devices more easily
- > Access Fatigue snapshots from the Dashcams page to help identify cameras that may be faulty, tampered with, obstructed or incorrectly aligned
- > Jump from a Replay event directly to its associated Dashcams page with one click

WHY IT MATTERS

- > Find relevant devices faster, especially across large or complex fleets
- > Track devices awaiting repair or replacement more clearly
- > Reduce time spent navigating between event review and dashcam management

Available now in MyEROAD > Dashcams. No action required.
