

Review dashcam events with more clarity and detail

New Replay improvements help your team investigate events faster and with greater confidence

WHAT'S NEW

More context when reviewing footage

- > See the exact time video footage was uploaded to MyEROAD
- > Fatigue camera thumbnails now displayed for **No driver visible** events
- > Use the interactive speed graph to view the exact vehicle speed at any point in an event

Clearer event information

- > The tag **No driver detected** is now named **No driver visible**
- > **Vaping tag** now available to select for more accurate classification and reporting
- > The speed graph display issue has been resolved for more reliable playback data.

WHY IT MATTERS

- > Understand event context more quickly
- > Investigate footage with more precise speed and camera information
- > Make more confident decisions about which events require follow-up

Available now in Replay. No action required.
