

Smarter, more accurate driver alerts

Fine-tuned AI detectors for more reliable safety insights

THE OPPORTUNITY

You need alerts you can trust. Alerts that help drivers improve in the moment and help your team focus on follow-up where it matters most.

WHAT'S NEW

We've fine-tuned several Clarity Edge AI detectors using real-world performance data and customer feedback to improve alert reliability for you and your drivers.

1. **Mobile Phone Detection:** refined sensitivity and a 60-second stand-down time
2. **Distraction:** refined head-movement thresholds, a 60-second stand-down time, and alerts paused during lane departure
3. **Smoking Detection:** now also detects smoking while the vehicle is stationary
4. **No Driver Detection:** refined sensitivity

WHY IT MATTERS

- > Drivers get more relevant safety alerts
 - > You get more reliable information for coaching and review
- Available now in Replay. No action required.
