SAFETY & RISK MANAGEMENT

Mobile phone alert accuracy

Customer-ready | Released: **Oct 2026**

Platform: **MyEROAD**, **Core360** | Availability: All markets

Hardware: Clarity Edge

AI model update improves accuracy of mobile-phone detection.

THE OPPORTUNITY

Drivers and safety teams need mobile phone alerts they can trust so coaching stays focused on genuine risk..

WHAT'S NEW

Clarity Edge mobile phone detection has been enhanced using real-world driving scenarios and customer feedback.

The updated AI model is better able to distinguish mobile phone use from behaviours such as certain hand positions on the steering wheel, eating/drinking or holding other everyday items like cups/bottles.

WHY IT MATTERS

> Better accuracy means more confidence in mobile phone events

> Help reduce unnecessary event review
