EROAD

DRIVER MANAGEMENT

Customer-ready | Released: **Nov 2026**

Platform: **MyEROAD** | Availability: North America

Hardware: N/A

New driver profiles page

A re-built driver profiles page makes driver administration and compliance tasks quicker and easier for customers in North America.

THE OPPORTUNITY

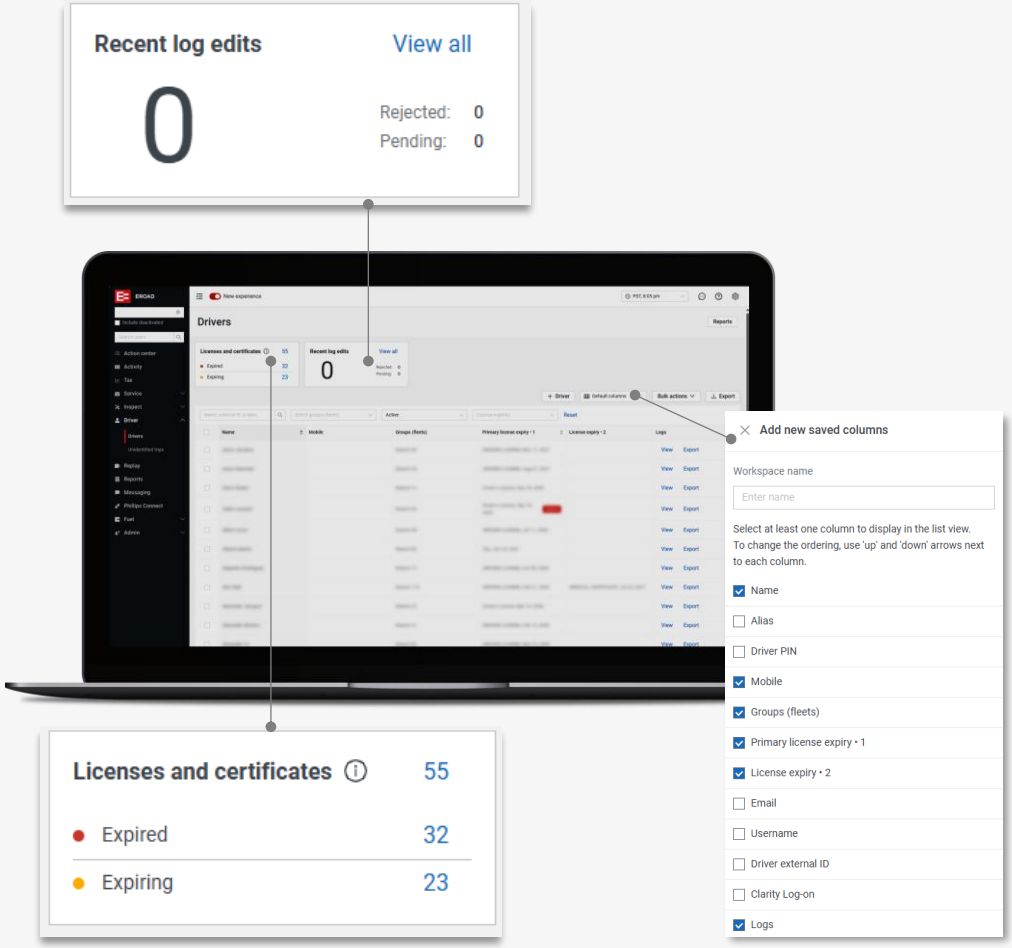

Fleet teams need quick access to the driver information and logs that matter most, without spending time searching through large driver lists or exporting records one at a time.

WHAT'S NEW

The new driver management experience brings faster performance, more flexible data views and simpler access to driver compliance information. Updates include:

1. **Configurable workspace** — choose which driver-data columns appear
2. **Advanced filtering and sorting** — find drivers by fleet, license status and more
3. **Faster performance** — a quicker, smoother experience when managing large driver lists
4. **Bulk ELD log exports** — select multiple drivers and export their ELD logs at once
5. **Quick access to driver logs** — view or export an individual driver logs from the list

Note this release is for customers in North America. The new features were previously been released in Australia and New Zealand.

WHY IT MATTERS

> Find and manage driver information faster

> Reduce time spent on routine compliance tasks, including ELD log exports

> Make large driver lists easier to search, review and maintain
