EROAD

SHARED VEHICLE MANAGEMENT

Customer-ready | Released: **Sep-Nov 2026**

Platform: **BookIt** | Availability: Australia, New Zealand

BookIt subscription required

Optimise pool vehicle availability

New booking and admin improvements to support optimal pool vehicle availability.

THE OPPORTUNITY

When shared vehicles are booked for longer than they're needed, other staff can miss out, even when vehicles are sitting unused.

WHAT'S NEW

1. **Set maximum booking durations** - Admins can now set a maximum booking length, such as two hours, under Manage Settings > Booking Policies. This helps encourage shorter bookings where appropriate and makes vehicles available to more people throughout the day.
2. **See only available vehicles when editing a booking** - When changing a booking's date, time or vehicle, the Vehicle dropdown now shows only vehicles available for the selected time.
3. **Simplified branch administration** - The Branch Admin and Multi Branch Admin roles have been combined. Admins can now select which branches a user can administer when assigning the role.

Existing Branch Admin and Multi Branch Admin users have been updated automatically.

For full details, go to **Release Notes** within the **BookIt platform**
