

# OVER SPEED DASHBOARD

EROAD Over Speed Dashboard makes monitoring speed across your fleet easy, showing events and trends at vehicle, driver and fleet level, helping you improve safety, reduce costs, and minimize liability.

### Accelerate safety

Speeding can affect the severity of a crash, your CSA score, profitability, and driver retention.

Greater transparency around driver speeds allows you to better manage risks and improve safety and performance across your fleet.

EROAD's Over Speed Dashboard provides a record of vehicle speeding events that exceed posted speed limits. The dashboard presents an overview of speeding behavior across your fleet, including trends, and enables you to focus on individual speeding events and improve analysis. If you don't have time to log in each day to view reports, you can schedule key reports to be delivered to your fleet managers' inbox daily or weekly.

### KEY BENEFITS

**Monitor driving behavior** A view of sophisticated and highly accurate over speed activity by your drivers lets you easily monitor and manage driving behavior to modify and improve driving over time

**Protect your business** Maintain and improve your CSA score

**Reduce costs** Reduce the cost of collisions and insurance claims and unsafe driving violations

**Support your drivers** Help drivers self-manage with easy-to-read over speed charts available as they go on and off their shifts, on a tablet, laptop or pin-up printouts

**Save on fuel** Reduce fuel consumption by speeding less - vehicles need more power and fuel to drive at higher speeds
