

# EROAD INTEGRATION – API

EROAD Integrations API allows you to integrate rich data with your other business software, saving you time, providing you better insight into your fleet and reducing your development costs for new business initiatives. Our API uses modern REST (Representational State Transfer) architecture that allows for easy and fast integration.

### Enable powerful integrations and insights

Fleet operators want to make use of EROAD's highly reliable, accurate and rich data to make informed decisions. This includes relevant vehicle data supplied by EROAD's partners that can be displayed in EROAD's web application, Depot.

EROAD provides an open, standards-based interface using the REST architecture and provides an easy and intuitive way of communication with EROAD via the HTTP protocol.

Additional fees may apply to the use of EROAD APIs.

### KEY BENEFITS

#### More efficient

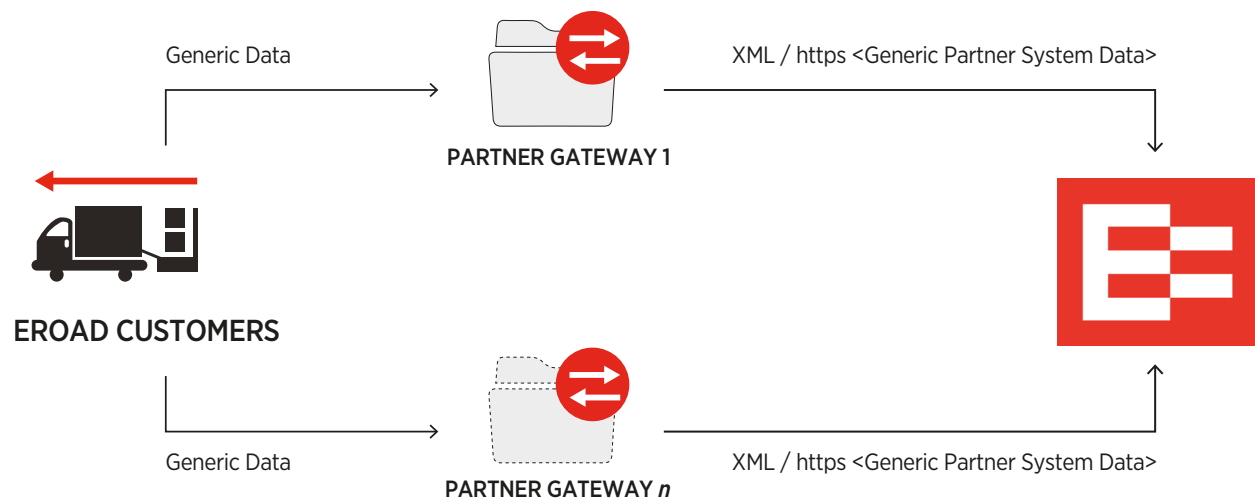

Data is in one place, providing a single view of your business data

#### Saves time

Eliminates manual data entry and avoids input errors

#### Keeps your data in sync

Enables integration into back end systems to keep data in sync

## EROAD INTEGRATION - API

### KEY FEATURES

- › Allows customers and partners to retrieve current vehicle location and other valuable information
- › Allows retrieval of Hours of Service such as driver duty time and availability
- › Automates management of vehicles in fleets
- › Allows messaging to the driver through EROAD's in-vehicle device
