

Technology, fueling and travel services enhance compliance

EROAD's user-friendly technology enables you to efficiently utilize your capital and reduce the biggest costs associated with managing your fleet. Our electronic solution automates manual and paper-based systems, reducing your administrative costs, and making compliance simpler.

Fuel management, fleet utilization reporting, vehicle maintenance, WMT and IFTA automation and driver safety are just some of the advanced solutions that EROAD has developed to help transform your business.

ELECTRONIC TAX MANAGEMENT

EROAD electronic tax management allows you to ditch paper records and significantly reduce workload for your drivers and back office staff. Our solution accurately and reliably captures and calculates weight-mile and fuel tax information, and records contain all required data elements to ensure you meet your legal obligations. Electronic tax reporting eliminates the cost of manual data entry, and decreases accidental non-compliance.

COMMERCIAL FUELING AND TRAVEL SERVICES

Our partnership with Jubitz Corporation enables us to offer our customers enhanced fuel management, fuel consumption reporting and IFTA fuel tax reporting, simplifying compliance, reducing paperwork and lowering costs. Jubitz travel and driver services help simplify fleet management and keep your drivers on the road.

JUBITZ KEY FEATURES

- Commercial fleet fueling
- Fuel card management
- Fuel reporting
- Fleet services
- Mobile refueling
- Driver services
- Truck service center

SIMPLER COMPLIANCE

Our range of driver support products help you simplify compliance, improve safety, and retain staff. Our compliance suite includes EROAD Electronic Logbook, DVIR, and driver behavior benchmarking and feedback.

COMMERCIAL SERVICES

Our system allows you view and monitor vehicles in real time from any web-enabled device, and enjoy improved fleet productivity, better route planning, and higher customer satisfaction. Data generated by our system provides you with the insights you need to make the right business decisions.

TRUSTED PARTY

EROAD is a trusted party of our motor carrier clients and the government agencies we work with across North America. EROAD is aligned with, and meets or exceeds, internationally accepted control objectives and practices for privacy, security and information systems. The EROAD solution achieves an industry-leading 99.98% service uptime.
