## Our Brand

**Logo structure**

**Logo safe area and sizing**

**Limited use: Wordmark and logomark**

**Using the logo**

---

### EROAD Logo: Guidelines One-Pager
THE EROAD BRAND

Our brand is more than a logo pack, colour palette, images and typefaces. It’s what we stand for – how our customers see us, and how we differentiate ourselves in the market.

Our brand touches all aspects of our business, and is directly connected to our customer needs, emotions and competitive environments.

The EROAD brand stands for a set of core values that outline what customers can expect when they deal with EROAD.

These brand values should be reflected in how EROAD engages with its customers and delivers on its promise of value.
LOGO STRUCTURE

BRAND SIGNATURE
The EROAD brand signature consists of two components - the logomark and the wordmark.

The EROAD wordmark is specially kerned and adjusted, and is set in the typeface Gotham Bold. It should not be typed out or re-written under any circumstances.

Both the horizontal and vertical logos can be used in any instance. Any other configuration of the signature is not authorised for use.

ISOLATED MARKS
The isolated logomark or wordmark can only be used in limited circumstances – any use of the single logomark or wordmark should be approved by the EROAD Brand team.

Please email design@eroad.com for approvals.
MINIMUM SPACE

The logo needs sufficient space around it so that it is not confused with other words or wordmarks. It needs to be legible and work as a standalone graphic.

We measure the exclusion zone by taking the height of the =. You can use it as a guide to mark out the surrounding area.

As illustrated here, this means using a single = height to measure the minimum space above, below, to the left and right of the logo.

SIZING

The word ‘EROAD’ needs to be legible at all times. There is no standard size, but the minimum sizes are shown here.

22mm / 0.85in / 85px

11mm / 0.45in / 43px
LIMITED USE: LOGOMARK SAFE AREA AND SIZING

MINIMUM SPACE
If there are lots of elements crowding the logo, it loses impact. The exclusion zone refers to the minimum amount of space required around the EROAD logomark, at any time.
We measure the exclusion zone by taking the height of the = symbol. You can extract this from the logo and use it as a guide to mark out the surrounding area.
As illustrated here, this means using a single = height to measure the minimum space above, below, to the left and right of the logo.

SIZING
The EROAD logomark must be used as big as possible. The preferred standard size is 40mm, 1.6in or 190px wide.
Minimum size on printed material is 12mm, 0.5in or 80px wide. On smaller promotional items such as pens, USB sticks or badges, the logomark can go down to 8mm wide.

40mm / 1.6in / 190px
12mm / 0.5in / 80px
**LIMITED USE: WORDMARK SAFE AREA AND SIZING**

**MINIMUM SPACE**
The wordmark needs sufficient space around it so that it is not confused with other words or wordmarks. It also needs to be legible and work as a standalone graphic.

We measure the exclusion zone by taking the height of the letter D. You can extract this from the wordmark and use it as a guide to mark out the surrounding area.

As illustrated here, this means using a single D height to measure the minimum space above, below, to the left and right.

**SIZING**
The EROAD wordmark needs to be legible at all times. It needs to be as big as possible for building or venue signage.

Standard minimum size on promotional material such as pens the wordmark can go down to 30mm wide.

For smaller surfaces, for example a USB stick, the wordmark can go down to 9mm width.
CHOOSING THE CORRECT LOGO

LOGO USAGE
The full colour logo is the preferred option. Where there is a background with insufficient contrast, the official reverse logos can be used.
When using a reverse logo, give preference to the colour reverse, rather than the all white logo.
PLACING THE LOGO ON A BACKGROUND

ACCEPTABLE CONTRAST

Background colours and images must not affect the legibility or clash with the EROAD logo.

The preferred treatment is the full colour logo on an open white background.

If it must be used on a photographic or coloured background, please use a reverse logo.

There must always be sufficient contrast to ensure the logomark and wordmark are clear and recognisable.

White is the preferred background colour for the logo.

Never use a background colour without sufficient contrast to the logo.

The logo can be placed on other light, neutral colored backgrounds.

Never place the logo on a pattern which renders it unreadable.

The reverse version should be used when placed over dark colours.

Always opt for the colour logomark, rather than the all-white logo.

With any background, always place the logo in a way that ensures legibility.

Never use the logo on an image in a way that makes it unreadable.
PROTECTING THE LOGO

Only the original EROAD logo should be used on all materials. Do not reproduce, redraw, change, alter, recreate or combine any other graphic or typographic elements. Shown here are some examples of unacceptable usage.

Never substitute the wordmark for a typed word in the logo

Never change the colours of the logomark or wordmark

Never outline any of the elements of the logomark or wordmark

Never change the size relationships or positioning of the logo elements

Never flip or reposition any of the elements of the logomark or wordmark

Never resize any portion of the logomark or the wordmark

Never alter the logomark in any way

Never alter the wordmark in any way, never type it out yourself even if you have the official font

Never add effects such as bevel, textures or drop shadows

Never use the inside element of the logomark (the ‘E’ on its own)

Never fill in any of the elements of the logomark or wordmark

Never skew the logo and ensure it is always sized proportionately
EROAD LOGO GUIDELINES ONE-PAGER

EROAD BRAND SIGNATURE
The EROAD signature is made up of two components, the logomark and the wordmark. The wordmark is a specially kerned and adjusted version of Gotham Bold. These components must never be altered, reproduced or changed in any way.

REVERSED LOGO
Please use the reversed logos on backgrounds with sufficient contrast. Always give preference to the coloured reverse over the all-white logo.

LOGO FORMATS
Please use the relevant format of the logo. This will ensure accurate colour output and resolution. EPS/Vector logos are to be used for all collateral with exception to digital marketing/web use.

<table>

<td>EPS, PDF</td>
<td>CMYK, PMS</td>
</tr>
</tbody>
</table>

SAFE AREA
The exclusion zone refers to the minimum amount of space required around the logo. Respecting this space will minimise the chance of clashes with other elements or logos in any design.

MINIMUM SIZE
The word ‘EROAD’ needs to be legible at all times. The minimum size is 0.85in or 22mm wide.

PROPORTIONS
Please ensure the logo is always resized proportionally and does not get skewed. Don’t crop or change, add elements or change the orientation of the logo in any way.

0.85in / 22mm / 85px
11mm / 0.45in / 43px

ERoad Where Sub-Brand

ERoad Where

ERoad Where is an affordable asset tracking solution for assets which move around such as trailers, waste bins, freight cages, construction and trade equipment.

Find out more about ERoad Where here.
**PRIMARY AND SECONDARY LOGOS**

The EROAD Where logo uses the same red and black from the EROAD corporate palette, and is typeset in Gotham Bold. It has been custom kerned and consists of two components: the word EROAD and Where. These two components are always placed in a fixed relationship and should never be altered, redrawn or modified.

This logo should be primarily used in full colour with preference to the stacked (vertical) lockup.
ERoad WHERE: MINIMUM SIZE AND APPLICATION

MINIMUM SIZE
The logo must never be below minimum size as the words ‘ERoad’ and ‘Where’ have to be legible at all times.

For both stacked and horizontal, the minimum width is 0.85in, 22mm or 85px.

APPLYING THE ERoad WHERE LOGO
When applying the logo to merchandise, collateral and signage, please follow the guidelines for minimum size and proportion to ensure best legibility.

Both the horizontal and stacked logo can be used, with preference being for full colour over the reverse application.

</tr>
</tbody>
</table>
GOTHAM FAMILY
Gotham is a family of widely used geometric sans-serif digital typefaces. Gotham’s letterforms are inspired by a form of architectural signage found in New York City.
EROAD’s official typeface library consists of Gotham and Gotham Narrow. Both fonts are versatile, legible at smaller sizes and suitable for both screen and print.
Gotham Bold and Gotham Narrow Light are used the most, for display and body copy. Each font has various weights and oblique options.
No other fonts should be used on EROAD design or marketing collateral, unless otherwise specified in the Font Matrix in this section of the brand guidelines.

GOTHAM NARROW LIGHT

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
01234567890 • !@#$%^&*(){}
ERoad’s Family of Fonts

**GOTHAM NARROW**
Gotham Narrow is more suitable for large amounts of text, and must be used for all text including headings, paragraphs and body copy.

Gotham Narrow is our primary corporate font, unless otherwise specified.

**GOTHAM**
Gotham is used sparingly across our collateral. It is primarily used for headings, on large signage and almost always used as Gotham Bold over any other weight.

Gotham should not be used for body copy under any circumstances.

FRANKLIN GOTHIC

Our font choice for office templates is Franklin Gothic. It has various weights and is a system font which is inbuilt in the Microsoft Office suite.

The official EROAD templates for all Powerpoint presentations and Word documents should be used at all times.

You will find that there are two condensed fonts (Franklin Gothic Demi Cond or Medium Cond) as part of the typeface - we do not use these fonts in our collateral.

PARAGRAPHS STYLES
For design and marketing collateral, the paragraph styles are embedded into their respective templates.

This is a basic guide and general overview of the typesetting employed throughout EROAD’s company collateral.

Discretion can be used with regards to sizes for headlines, for example if the collateral is at a larger scale the heading can be much larger than 20pt.

Note on leading: A general rule is to multiple the font size by 1.25 to get the optimum leading.

Medium can be used for headlines

12PT LIGHT IS FOR SUBHEADINGS

10PT BODY HEADINGS ARE SET IN BOLD

9pt Light is used for all regular body copy
USER INTERFACE / PRODUCT

**ROBOTO**
Roboto is EROAD’s font for the Ehubo and for Depot.

Roboto has a dual nature. It has a mechanical skeleton and the forms are largely geometric. At the same time, the font features friendly and open curves.

<table>
<thead>
<tr>

WEBSITE TYPEFACE & STYLES

**ROBOTO**

Roboto is also our standard typeface for websites. It is EROAD's primary font for all digital applications, including product and user interface design.

For our websites, the font stack is: ‘Roboto’, “Helvetica Neue”, Arial, sans-serif

For email newsletters, our font stack is: Helvetica, Arial, sans-serif

**General colour usage:**

- Body copy: #333333;
- Header: #555555;
- Link: #ee3124;
- Normal colour: #ee3124;
- Hover colour: #7f1a13;
- Grey block: #eeeeee;

CORPORATE COLOURS

LOGOMARK
EROAD’s logomark is set in EROAD Red with the ‘E’ graphic set in white. Red is our primary corporate signature colour and is used as an accent across the brand, along with black and shades of grey.

The colour breakdown of EROAD Red for both digital and print, and the colour breakdown for the EROAD wordmark is shown here.

It is important to use the correct EROAD Red colour value in order to strengthen our brand’s identity and alignment with our corporate red.

WORDMARK
The wordmark is set in 100% Black with the colour breakdown shown.
NEUTRAL PALETTE
A neutral palette of greys can be used throughout the brand in a variety of ways - for example in graphs, charts or infographics. These can vary in shade according to how many are needed at any one time.

TERTIARY PALETTE
The tertiary colour palette is primarily used in infographics, charts and other illustrations.

These colours are to be used in conjunction with the primary palette. Please note the dominant colours in any collateral should be black, grey and red. Please refer to the colour usage page to see a proportional breakdown.

The tertiary palette has been developed as a supporting palette for use by the EROAD Design Studio - please get in touch if you would like to use these colours in any corporate collateral.
USING THE PALETTE

Shown here is the proportion of how colour should be used when creating any collateral – digital or print.

Tertiary colours are to be used as accents, primarily for infographics and charts. They should never be used in a way that makes them more prominent than the primary palette which is Charcoal, White and EROAD Red.
## PRODUCT PALETTE

### DEPOT, MOBILE APPS AND EHUBO

Shown here are some of the colours we currently use in our product interface.

</table>
EROAD’S IMAGERY
EROAD’s photo library comprises high-quality images of vehicles, customers, EROADers and EROAD hardware, localised by region.

Our policy of using professionally shot, original images rather than stock photography is integral to our brand recognition.

It differentiates us from the competition, and helps define EROAD as unique, innovative and focused on quality.

We use both photos of customer vehicles, and generic vehicles. Where a vehicle is not part of a customer’s fleet, we remove the company’s branding. Customer branding should not be removed.

PHOTOGRAPHY STYLE
We create different styles for each campaign but apply consistent, high-quality production values to each campaign.
ICONS FOR USE IN COLLATERAL
EROAD's icon library has been developed for both digital and print use. These icons are created for marketing material and select areas of product interface.

Our icons have a consistent look and feel. In general, the colours used in our icons are red, black and occasionally grey.

Examples of our standard icons are shown here. Please get in touch with the design studio if you need access to our library of icons.
INFOGRAPHICS

ERoad INFOGRAPHICS

Our infographics are clean, sharp and make use of our tertiary palette.

Please get in touch with the design studio if you would like an infographic created.
VIBRANT IMAGERY, BOLD TYPOGRAPHY AND ACCENTS OF EROAD RED

Rich use of unique imagery, clean lines and the use of red helps to define our brand as elegant, vibrant and contemporary.

The following describes EROAD’s brand aesthetic:

- High quality photography championing the customer wherever possible
- Black, white and grey are dominant colours with accents of red. Tertiary colours are used sparingly within charts and infographics
- Headings and statements can be bold and typographic – don’t shy away from large text
- An anchoring red line is found in most corporate collateral and advertising.
