

EROAD for Oil and Gas Field Services

On the highway. Off road. At the well site. EROAD has you covered.

EROAD offers the industry's highest-rated ELD delivering everything you need to boost safety, achieve FMCSA compliance, simplify tax reporting and drive better operations.

BOOST FLEET SAFETY AND REDUCE RISK

- Get instant notification when drivers speed or use harsh braking, acceleration and cornering, so you can coach and reduce risk
- Location readings every second combined with sensitive accelerometer data let you create a clear accident reconstruction to determine what happened and who's at fault
- With EROAD, drivers don't use cell phones, so safety at well sites is not compromised

STAY COMPLIANT

- EROAD was designed with drivers in mind—easy workflows, no dropped signals. It just works
- Whether running on oilfield HOS exemption or other intrastate HOS rules, we make it easy for drivers to operate under correct regulations
- Eliminate “form and manner” violations and make inspections and audits a breeze – we automatically annotate HOS exemptions on events so your drivers can focus on the task at hand

MAKE TAXES EASIER TO PROCESS AND MAXIMIZE SAVINGS

- Get rid of the IFTA paperwork nightmare with automated data collection on mileage and fueling events by jurisdiction
- Eliminate administrative work with IFTA e-file or formatted reports that simplify manual filing
- The superior accuracy of the EROAD system lets you easily report off-highway miles for applicable exemptions

GET FLEET OPERATIONS INTO HIGH GEAR

- Track activity and utilization of all the trucks in your fleet
- Monitor and control driver behaviors that lead to high fuel costs and safety risks
- Simplify maintenance with automated service scheduling and a complete service history archive
- Replace labor intensive manual methods and spreadsheets for tracking driver data with an easy-to-use system featuring automated renewal alerts
