EROAD Go+

Mobile driver workflow plus truck-friendly routing

EROAD Go+ takes unleashed productivity a step further by giving drivers truck-friendly routing and turn-by-turn navigation. Drivers can visualize their day and start navigating right from the preloaded stop details to help them take the best routes, improving safety and on-time performance.

**Keep drivers on the safest route**

Drivers avoid restricted roads and low bridges using truck dimensions, weight, hazmat and other details stored in the app to automatically identify the best route.

Help drivers stay focused on the road

With navigation integrated into drivers' daily workflow, they simply click an address to get the best route without distractions from managing their phone or maps.

Save time and money

Avoid congestion and out of route miles that slow your operation down and increase fuel and maintenance costs.

Truck details stored in the GO+ navigation app enable automatic truck friendly routing.

Give your drivers the best toolkit for safety, productivity and professionalism.

- ✔ Enable safe, truck-friendly routing
- ✔ Save fuel costs by cutting out-of-route miles
- ✔ Help on-time performance by avoiding traffic congestion
