

# EROAD Go

## Rock solid compliance meets robust mobile driver workflow

EROAD Go gives your team an edge in the daily race against the clock and gives your operation an advantage in performance and profitability. Connecting critical parts of your team—accounting, dispatch, safety and compliance, and drivers—EROAD Go helps you get the data you need right where you need it.

### Automate dispatch and data collection from drivers

Eliminate manual dispatch, paper manifests and forms and the labor to manage and collect them and enter data.

### Give drivers the tools and information that they need to be safe, productive and professional

Put manifests and stop details at drivers' fingertips, along with routing tools to help ensure safe, efficient driving and timely arrivals.

### Speed up time to invoicing and simplify payroll

Get data back from the field and into your accounting system in seconds to decrease your DSO, improve cash flow and make paying drivers a snap.

## EROAD uses best-of-breed devices to ensure consistent compliance and productivity

### Dedicated in-cab device

Purpose-built, highly reliable and accurate device hardwired to the ECM

### Mobile workflow

Proven, robust tool for drivers on a flexible next-generation platform

## It's time to stop settling for underperforming technology and suppliers

Thousands of fleets worldwide rely on EROAD to improve safety, compliance and efficiency. We provide reliable, accurate solutions and back them up with best-in-class customer service. Are you looking to drive better and safer operations and higher performance? Want the same from your technology partner? We invite you to look to EROAD.

# How EROAD impacts your operation end-to-end

## Dispatch

Assign loads with better data, eliminate paper from the dispatch process and monitor drivers and loads in real time.

## Drivers

Stay in compliance effortlessly and move through the day with stop details, routing and tools to submit forms data and proof of delivery.

## Safety & Compliance

Manage safety and compliance with accurate, consistent data.

Keep CSA scores low and get through audits without a headache.

## Accounting/Backoffice

Get proof of delivery back faster to invoice quickly and improve cashflow. Manage OS&D easily. Pay drivers rapidly and improve morale.

## Key functions of the EROAD GO app

A robust design allows the app to handle real-world conditions and edge cases—such as use out of data coverage or dispatch route changes overlapping with driver activity—that ensures no loss of activity data. The app is tested and proven over millions of transactions per month by thousands of drivers.

- › Off-the-shelf integrations with McLeod and TMW TMS systems
- › Flexible middleware enables easy integration to other 3rd party TMS and IT-built systems
- › Push manifests and stop details to drivers' tablets/phones
- › Drivers invoke truck routed turn-by-turn nav from stop details
- › Specific flows for trailer add/drop, OS&D, returns, special services and more
- › Drivers capture and submit forms, signatures, images and bar code scans from the app
