Mcleod Software's LoadMaster Symphony Mobile Communications integrates with the EROAD application for use with wireless communications and GPS positioning tools. LoadMaster retrieves in near real-time the Hours of Service (HOS) and tractor GPS position updates throughout the day for better visibility in dispatch planning and in-progress load management.

Benefits

- Provides centralized visibility of drivers current HOS and location data to give load planners the information they need to assign the best drivers for available loads
- Improves driver utilization and productivity
- Increases visibility of out-of-route or late tractors with LoadMaster's use of EROAD reported tractor positions
- Helps driver managers to resolve HOS rule noncompliance issues
- Visibility of actual route GPS history
- Reduces time spent on setup of new drivers

Features

- Visibility to drivers' latest reported HOS updates from the EROAD ELD within Order Planning and Driver Management, including available drive and on-duty hours, as well as time logged per status category for both current day and cycle
- Tractor GPS position reports retrieved in near real-time are visible in LoadMaster Dispatch screens, including Order Planning and Driver Manager, as well as from Maps displaying position reports
- LoadMaster new driver record creation automatically sends driver data to EROAD for automated creation of an EROAD Driver record

Driver

Driver code: WILSONMI Driver type: Company

Name: WILSON MICHAEL

Address: 200 EAST NISHNA ROAD
