

EROAD

EROAD Asset Tracker

POWERED BY

Smart trailer solutions for all fleets

With EROAD Asset Tracker powered by Phillips Connect installed on your trailers and assets, it is easy to manage safety and compliance for your entire fleet. More than just tracking, we help you take a proactive approach to maintaining the health of your assets, giving you lower CSA scores and more productive drivers.

Featuring fast, easy installation and IP67 rated harnesses and device, you can count on all your fleet assets reporting in consistently. No gaps. No hassles. The same reliability and ease of use that EROAD is known for in the truck is now available for all your trailers and assets.

A full line of devices and form factors, plus add-on Bluetooth sensors for temp, ingress, load volume and trailer status.

PART OF THE TRAILER NETWORK

Devices install in minutes. Harnesses connect into your trailer's data network, giving you data on safety and status.

RELIABLE REPORTING

Reporting from "most" of your assets doesn't cut it. With EROAD Asset Tracker, you will see the whole picture.

TRAILER SAFETY MADE REAL

Remotely check TPMS, ABS and light status to keep service up, CSA scores down, and drivers and loads moving.

EROAD Asset Tracker

STEALTHNET

Hidden installation with a large back-up battery. Integrates with virtually any sensor for reliable, actionable insights. Ideal for trailer and chassis.

SOLARNET

2X battery capacity of competitive devices. Flexible visibility into a fleet's health and efficiency on-demand. Reliable solar-powered 4G-LTE tracking system.

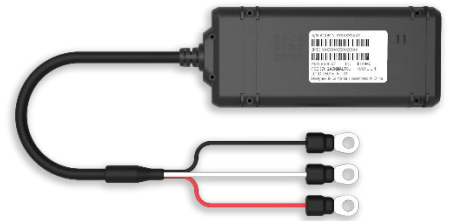

ASSETTRAC

High-performance peel and stick tracking device built to go anywhere. Monitor any powered or non-powered asset in your fleet from a single platform.

EZTRAC HE

Ideal for construction equipment, trailers, and boats. EZTrac™ HE is an asset tracking solution designed for the toughest conditions.

EROAD is Proud to Partner with Phillips Connect

Phillips Connect, like EROAD, has a strong focus on ease of use, uptime, and accuracy, which supports our mission to drive safer and more productive roads.
