

The Competitive Advantage of **TECHNOLOGY TOOLS IN CONSTRUCTION**

Construction involves many moving parts.

EROAD's fleet management technology simplifies processes by providing increased operational visibility into nearly every aspect of a job.

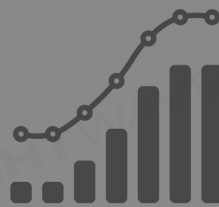

Time is money in construction, making the ROI of tech integrations critical.

A recent survey of 1,200 U.S. mobile-business professionals found that:

45% using fleet management solutions saw positive ROI in 11 months or less.

Of those, **22%** reported positive ROI in fewer than three months.

Companies using fleet management improved customer service by **54%**

EROAD gives fleets an edge by providing access to manage all aspects of the job in one place.

Increased productivity & efficiency with real-time job statusing and systems integrations

Safer fleets & a protected business with video telematics and driver coaching

Quality control & happier customers with actionable insights from IoT sensors + CoreHub as well as streamlined processes & project delivery

EROAD provides a better way to manage your fleet and outmaneuver your competition.
