# CoreHub Xtreme

Deliver loads with **confidence**

# Keep your goods safe in the **most extreme conditions**

CoreHub Xtreme is a next-generation ruggedized IoT reefer gateway that empowers fleet operators to monitor and control the efficiency and safety of their cold chain fleets on a single platform. Achieve true temperature control across multiple compartments inside a single reefer trailer using our CoreTemp (TM) technology. Know in real-time when issues related to the driver, load, and asset arise. Be confident you have the data and tools to help avoid lost loads, minimize risk, and prevent costly maintenance.

In-vehicle IoT hub with multiple wireless sensors

Comprehensive view of your driver, load, and asset

Easy to self install with the ability to add new features or sensors at any time

# Key Benefits

---

## **Ensure food safety and reduce lost loads**

Have confidence in the quality of loads you deliver. Reduce lost loads, claims, and lost revenue when you use contextual data from CoreHub Xtreme's expanding network of door, temperature, fuel and humidity sensors paired with our CoreTemp (TM) technology to achieve true temperature control. Futureproof your fleet with an always expanding suite of sensors and tools to assist with FSMA compliance.

---

## **Boost reefer and trailer health**

Boost fleet health and save maintenance costs by monitoring your reefer's uptime, fault codes, utilization, and performance. Have a pulse on your fleet's location and regulatory compliance with our two-way reefer commands and fleet management platform. Prevent reefer shutdowns with predictive insights and remotely diagnose faults for further savings.

---

## **Increase fuel savings and asset utilization**

Increase fuel savings and reduce carbon emissions across your entire fleet with remote pre-cooling and data analytics that help increase efficiencies around bulkhead management and switch-on time while your reefer is on or off. Know with certainty how and where your equipment was used. Our reefer insights, advanced geofencing, and prioritized alerts can deliver rapid ROI from reduced time and cost savings.

# Integrated IoT Sensors

---

## Wireless Door Sensor

Remotely detect when doors on a trailer open and close. Make smarter operational decisions, enhance security, and boost visibility across your fleet.

## Fuel Sensor

Always know your fuel level and when you need to refuel in real-time.

# Why CoreHub Xtreme

---

## Simplify compliance

Real time product temperature readings and two-way reefer control help keep you compliant with FSMA regulations. Configure custom alerts that give you the information you need to know and prevent problems.

## Tough, dependable design

Whether traversing mountains, deserts, highways or city streets, stay connected, compliant and in control – CoreHub Xtreme is tested to keep performing anywhere from -40 to 158 ° F.

## Integrate with major brands

Get real time visibility, operational information and remote control with our unparalleled integration with Thermo King, Carrier, and our expanding integration network.

## Easy to install

Unlike existing industry hardware that is complex and time consuming to install, CoreHub Xtreme is quick and easy to install, with an easy to use and free install application – saving you time and money, and getting your vehicles back on the road faster.

## Built for the future

Packed with industry leading technology and hardware components, CoreHub Xtreme can adapt to many future feature changes and requirements - saving you the cost of new devices in the future.

## Accurate, real-time data

4G high speed wireless connections, with 3G, GSM & GPRS fall back networks, mean you to receive real-time information when you need it. Solve issues in real time with rules alerting and automatic notifications to ensure safety and compliance across your fleet.
